THEORY OF THE INDEX: The American Chamber of Commerce Researchers Association (ACCRA) has but one purpose in developing this Index: To provide a useful and reasonably accurate measurement of inter-city cost of living differences. The items forming the basis of the Index have been carefully chosen to reflect the different categories of consumer expenditures. Weights assigned to relative costs are based on the latest government survey data on a mid-management executive family's pattern of expenditures for consumer goods and services. All items are priced at the local level by chamber of commerce research personnel at a specified time and by standard specifications, and converted to an index by programmed computer processing.

INTERPRETING THE INDEX: The ACCRA Cost of Living Index measures relative price levels for consumer goods and services in participating cities, as compared with the national average of 100 for all participating cities (metropolitan and nonmetropolitan). The ACCRA Index does not measure inflation (price change through time); each quarterly report is a separate comparison of prices at the single point in time, and both the number and the mix of cities may change from one quarter to the next.

Because the number of items priced is rather limited, it is not valid to treat percentage differences between cities as exact measures. Spreads of three or fewer index whole numbers in the All-Item Index do not represent statistically significant differences and may not correctly show which city is more expensive. Differences of more than three index whole numbers in the All-Items Index can be considered to represent actual inter-city differences in the costs of consumer goods and services; but the percentage difference in such cases should be considered a reasonable indication, rather than a precise measure, of the extent of the difference.

PARTICIPATING CITIES: The cities included in this survey are those whose chambers of commerce, or similar organizations, have volunteered to participate. The total number of respondents varies slightly from quarter to quarter, and a continuing effort is made to increase the coverage to include more metropolitan areas in the survey.

PRICE REPORTING: ACCRA reviews all prices reported and attempts to eliminate errors or non-compliance with specifications. All price data which form the basis of the Index are obtained from sources deemed reliable, but no representation is made as to the complete accuracy thereof. They are published subject to errors, omissions, changes and withdrawals without notice.

SPECIFICATIONS: The specific items priced are listed on page iii. The specifications listed for all food items are self-explanatory. The specifications listed for all non-food items are presented to the user only as a guide, since the price computations are based on extensive research within each city and in accordance with explicit specifications and procedural instructions.

EXCLUSION OF TAXES: ACCRA is fully cognizant that state and local taxes are an integral part of the cost of living, and that the burden varies considerably from state to state and even among communities in the same state. Due to the multiplicity of state and local taxes, taxing districts and assessment procedures, no adequate method exists to calculate the total tax burden for either inter-state or inter-city comparison, involving the whole range of state and local taxes levied on real and intangible property, retail sales, income and the excise taxes levied directly or indirectly on commodities.

QUARTERLY SURVEY DATA PRESENTED IN THREE SECTIONS:

- ALL-CITIES INDEX REPORT - This section arrays cities alphabetically by states and shows the Index calculated for each city's standing on the All-Items Index and on six component indexes: Groceries, Housing, Utilities, Transportation, Health Care and Misc. Goods & Services.
- METROPOLITAN CITIES INDEX REPORT - Index data are presented for participating cities within the same Metropolitan Statistical Area (MSA) or Primary Metropolitan Statistical Area (PMSA). This section is especially helpful when the central city of a metropolitan area is not represented in the Index but suburban cities are.

  While Index data for suburban cities can be used as surrogates for central city data, users should note that cost of living differences exist within large metropolitan areas, and that data for suburbs may not exactly match those which might have been obtained for a central city.
- PRICE REPORT - The prices reported by each city for all of the items in the survey are presented in alphabetical order by state. Also included is the nationwide median and average price, standard deviation and range for each item.

SUBSCRIPTIONS: The Quarterly Survey is available at a yearly subscription price of $75.00. Single copies of current or past studies are not available for distribution but may be inspected at the offices of participating chambers of commerce and at many libraries. Subscription order blanks are available from participating chambers of commerce and from the address listed above; or subscriptions may be placed directly with the ACCRA project's treasurer: Mrs. Alice Klein, c/o Louisville Area Chamber of Commerce, One Riverfront Plaza, Louisville, KY 40202.

INQUIRIES: Questions regarding the Index program, procedures or methodology may be directed to either: C.A. Kasdorf III, Houston Chamber of Commerce, 1100 Milam Bldg., 25th Floor, Houston, TX 77002 (tel. 713-658-2466) or Edward Sturgeon, Lexington Chamber of Commerce, P.O. Box 781, Lexington, KY 40587 (tel. 606-254-4447).

The American Chamber of Commerce Researchers Association — a non-profit corporation — was founded in 1961 and its membership comprises research staff of state and local chambers of commerce throughout the United States and Canada. In its dedication to improving business information through research, and recognizing the need for a measurement of relative living costs, the INTER-CITY COST OF LIVING INDICATORS PROJECT was developed and has been published quarterly since 1968.

The organization has no permanent office, with staff functions carried on by volunteer members, most of whom hold membership in the Chamber of Commerce of the United States. The association is an affiliate of the American Chamber of Commerce Executives, 4232 King St., Alexandria, Virginia 22302.

Price Report Column Headings

The items and specifications in this pricing study are listed below. The descriptions for HOUSING and UTILITIES are briefly highlighted, since pricing is based on explicit procedural instructions and very detailed specifications. Monthly housing payments and utility-use charges are not community-wide averages and should not be construed as such. • Pricing is based on sampling averages. The concept of a mid-management executive household is the guideline for selecting establishments and neighborhoods in which to price, and the minimum number of establishments to be surveyed depends upon the size of each community. • To ensure uniformity, national brands are stipulated whenever possible, and "lowest price" is the reported average of the lowest prices found in all stores surveyed. • Housing prices are published in whole dollars. All other items are presented in dollars and cents and published without the decimal point.

THEORY OF THE INDEX: The American Chamber of Commerce Researchers Association (ACCRA) has but one purpose in developing this index: To provide a useful and reasonably accurate measurement of inter-city cost of living differences. The items forming the basis of the index have been carefully chosen to reflect the different categories of consumer expenditures. Weights assigned to relative costs are based on the latest government survey data on a mid-management executive family's pattern of expenditures for consumer goods and services. All items are priced at the local level by chamber of commerce research personnel at a specified time and by standard specifications, and converted to an index by programmed computer processing.

INTERPRETING THE INDEX: The ACCRA Cost of Living Index measures relative price levels for consumer goods and services in participating cities, as compared with the national average of 100 for all participating cities (metropolitan and nonmetropolitan). The ACCRA index does not measure inflation (price change through time); each quarterly report is a separate comparison of prices at the single point in time, and both the number and the mix of cities may change from one quarter to the next.

Because the number of items priced is rather limited, it is not valid to treat percentage differences between cities as exact measures. Spreads of three or fewer index whole numbers in the All-Item Index do not represent statistically significant differences and may not correctly show which city is more expensive. Differences of more than three index whole numbers in the All-Items Index can be considered to represent actual inter-city differences in the costs of consumer goods and services; but the percentage difference in such cases should be considered a reasonable indication, rather than a precise measure, of the extent of the difference.

PARTICIPATING CITIES: The cities included in this survey are those whose chambers of commerce, or similar organizations, have volunteered to participate. The total number of respondents varies slightly from quarter to quarter, and a continuing effort is made to increase the coverage to include more metropolitan areas in the survey.

PRICE REPORTING: ACCRA reviews all prices reported and attempts to eliminate errors or non-compliance with specifications. All price data which form the basis of the index are obtained from sources deemed reliable, but no representation is made as to the complete accuracy thereof. They are published subject to errors, omissions, changes and withdrawals without notice.

SPECIFICATIONS: The specific items priced are listed on page iii. The specifications listed for all food items are self-explanatory. The specifications listed for all non-food items are presented to the user only as a guide, since the price computations are based on extensive research within each city and in accordance with explicit specifications and procedural instructions.

EXCLUSION OF TAXES: ACCRA is fully cognizant that state and local taxes are an integral part of the cost of living, and that the burden varies considerably from state to state and even among communities in the same state. Due to the multiplicity of state and local taxes, taxing districts and assessment procedures, no adequate method exists to calculate the total tax burden for either inter-state or inter-city comparison, involving the whole range of state and local taxes levied on real and intangible property, retail sales, income and the excise taxes levied directly or indirectly on commodities.

QUARTERLY SURVEY DATA PRESENTED IN THREE SECTIONS:

- ALL-CITIES INDEX REPORT - This section arrays cities alphabetically by states and shows the index calculated for each city's standing on the All-Items Index and on six component indexes: Groceries, Housing, Utilities, Transportation, Health Care and Misc. Goods & Services.
- METROPOLITAN CITIES INDEX REPORT - Index data are presented for participating cities within the same Metropolitan Statistical Area (MSA) or Primary Metropolitan Statistical Area (PMSA). This section is especially helpful when the central city of a metropolitan area is not represented in the index but suburban cities are.

  While index data for suburban cities can be used as surrogates for central city data, users should note that cost of living differences exist within large metropolitan areas, and that data for suburbs may not exactly match those which might have been obtained for a central city.
- PRICE REPORT - The prices reported by each city for all of the items in the survey are presented in alphabetical order by state. Also included is the nationwide median and average price, standard deviation and range for each item.

SUBSCRIPTIONS: The Quarterly Survey is available at a yearly subscription price of $75.00. Single copies of current or past studies are not available for distribution but may be inspected at the offices of participating chambers of commerce and at many libraries. Subscription order blanks are available from participating chambers of commerce and from the address listed above; or subscriptions may be placed directly with the ACCRA project's treasurer: Mrs. Alice Klein, c/o Louisville Area Chamber of Commerce, One Riverfront Plaza, Louisville, KY 40202.

INQUIRIES: Questions regarding the index program, procedures or methodology may be directed to either: C.A. Kasdorf III, Houston Chamber of Commerce, 1100 Milam Bldg., 25th Floor, Houston, TX 77002 (tel. 713-658-2466) or Edward Sturgeon, Lexington Chamber of Commerce, P.O. Box 781, Lexington, KY 40587 (tel. 606-254-4447).

The American Chamber of Commerce Researchers Association — a non-profit corporation — was founded in 1961 and its membership comprises research staff of state and local chambers of commerce throughout the United States and Canada. In its dedication to improving business information through research, and recognizing the need for a measurement of relative living costs, the INTER-CITY COST OF LIVING INDICATORS PROJECT was developed and has been published quarterly since 1968.

The organization has no permanent office, with staff functions carried on by volunteer members, most of whom hold membership in the Chamber of Commerce of the United States. The association is an affiliate of the American Chamber of Commerce Executives, 4232 King St., Alexandria, Virginia 22302.

Price Report Column Headings

The items and specifications in this pricing study are listed below. The descriptions for HOUSING and UTILITIES are briefly highlighted, since pricing is based on explicit procedural instructions and very detailed specifications. Monthly housing payments and utility-use charges are not community-wide averages and should not be construed as such. • Pricing is based on sampling averages. The concept of a mid-management executive household is the guideline for selecting establishments and neighborhoods in which to price, and the minimum number of establishments to be surveyed depends upon the size of each community. • To ensure uniformity, national brands are stipulated whenever possible, and "lowest price" is the reported average of the lowest prices found in all stores surveyed. • Housing prices are published in whole dollars. All other items are presented in dollars and cents and published without the decimal point.

THEORY OF THE INDEX: The American Chamber of Commerce Researchers Association (ACCRA) has but one purpose in developing this Index: To provide a useful and reasonably accurate measurement of inter-city cost of living differences. The items forming the basis of the Index have been carefully chosen to reflect the different categories of consumer expenditures. Weights assigned to relative costs are based on the latest government survey data on a mid-management executive family's pattern of expenditures for consumer goods and services. All items are priced at the local level by chamber of commerce research personnel at a specified time and by standard specifications, and converted to an index by programmed computer processing.

INTERPRETING THE INDEX: The ACCRA Cost of Living Index measures relative price levels for consumer goods and services in participating cities, as compared with the national average of 100 for all participating cities (metropolitan and nonmetropolitan). The ACCRA Index does not measure inflation (price change through time); each quarterly report is a separate comparison of prices at the single point in time, and both the number and the mix of cities may change from one quarter to the next.

Because the number of items priced is rather limited, it is not valid to treat percentage differences between cities as exact measures. Spreads of three or fewer index whole numbers in the All-Item Index do not represent statistically significant differences and may not correctly show which city is more expensive. Differences of more than three index whole numbers in the All-Items Index can be considered to represent actual inter-city differences in the costs of consumer goods and services; but the percentage difference in such cases should be considered a reasonable indication, rather than a precise measure, of the extent of the difference.

PARTICIPATING CITIES: The cities included in this survey are those whose chambers of commerce, or similar organizations, have volunteered to participate. The total number of respondents varies slightly from quarter to quarter, and a continuing effort is made to increase the coverage to include more metropolitan areas in the survey.

PRICE REPORTING: ACCRA reviews all prices reported and attempts to eliminate errors or non-compliance with specifications. All price data which form the basis of the Index are obtained from sources deemed reliable, but no representation is made as to the complete accuracy thereof. They are published subject to errors, omissions, changes and withdrawals without notice.

SPECIFICATIONS: The specific items priced are listed on page iii. The specifications listed for all food items are self-explanatory. The specifications listed for all non-food items are presented to the user only as a guide, since the price computations are based on extensive research within each city and in accordance with explicit specifications and procedural instructions.

EXCLUSION OF TAXES: ACCRA is fully cognizant that state and local taxes are an integral part of the cost of living, and that the burden varies considerably from state to state and even among communities in the same state. Due to the multiplicity of state and local taxes, taxing districts and assessment procedures, no adequate method exists to calculate the total tax burden for either inter-state or inter-city comparison, involving the whole range of state and local taxes levied on real and intangible property, retail sales, income and the excise taxes levied directly or indirectly on commodities.

QUARTERLY SURVEY DATA PRESENTED IN THREE SECTIONS:

- ALL-CITIES INDEX REPORT - This section arrays cities alphabetically by states and shows the Index calculated for each city's standing on the All-Items Index and on six component indexes: Groceries, Housing, Utilities, Transportation, Health Care and Misc. Goods & Services.
- METROPOLITAN CITIES INDEX REPORT - Index data are presented for participating cities within the same Metropolitan Statistical Area (MSA) or Primary Metropolitan Statistical Area (PMSA). This section is especially helpful when the central city of a metropolitan area is not represented in the Index but suburban cities are.

  While Index data for suburban cities can be used as surrogates for central city data, users should note that cost of living differences exist within large metropolitan areas, and that data for suburbs may not exactly match those which might have been obtained for a central city.
- PRICE REPORT - The prices reported by each city for all of the items in the survey are presented in alphabetical order by state. Also included is the nationwide median and average price, standard deviation and range for each item.

SUBSCRIPTIONS: The Quarterly Survey is available at a yearly subscription price of $75.00. Single copies of current or past studies are not available for distribution but may be inspected at the offices of participating chambers of commerce and at many libraries. Subscription order blanks are available from participating chambers of commerce and from the address listed above; or subscriptions may be placed directly with the ACCRA project's treasurer: Mrs. Alice Klein, c/o Louisville Area Chamber of Commerce, One Riverfront Plaza, Louisville, KY 40202.

INQUIRIES: Questions regarding the Index program, procedures or methodology may be directed to either: C.A. Kasdorf III, Houston Chamber of Commerce, 1100 Milam Bldg., 25th Floor, Houston, TX 77002 (tel. 713-658-2466) or Edward Sturgeon, Lexington Chamber of Commerce, P.O. Box 781, Lexington, KY 40587 (tel. 606-254-4447).

The American Chamber of Commerce Researchers Association — a non-profit corporation — was founded in 1961 and its membership comprises research staff of state and local chambers of commerce throughout the United States and Canada. In its dedication to improving business information through research, and recognizing the need for a measurement of relative living costs, the INTER-CITY COST OF LIVING INDICATORS PROJECT was developed and has been published quarterly since 1968.

The organization has no permanent office, with staff functions carried on by volunteer members, most of whom hold membership in the Chamber of Commerce of the United States. The association is an affiliate of the American Chamber of Commerce Executives, 4232 King St., Alexandria, Virginia 22302.

Price Report Column Headings

The items and specifications in this pricing study are listed below. The descriptions for HOUSING and UTILITIES are briefly highlighted, since pricing is based on explicit procedural instructions and very detailed specifications. Monthly housing payments and utility-use charges are not community-wide averages and should not be construed as such. • Pricing is based on sampling averages. The concept of a mid-management executive household is the guideline for selecting establishments and neighborhoods in which to price, and the minimum number of establishments to be surveyed depends upon the size of each community. • To ensure uniformity, national brands are stipulated whenever possible, and "lowest price" is the reported average of the lowest prices found in all stores surveyed. • Housing prices are published in whole dollars. All other items are presented in dollars and cents and published without the decimal point.

ABOUT THE INDEX: The American Chamber of Commerce Researchers Association (ACCRA) has one purpose in producing this Index: to provide a useful and reasonably accurate measure of living cost differences among urban areas. The items on which the Index is based have been carefully chosen to reflect the different categories of consumer expenditures. Weights assigned to relative costs are based on government survey data on expenditure patterns for midmanagement households. All items are priced in each place at a specified time and according to standardized specifications.

INTERPRETING THE INDEX: The ACCRA Cost of Living Index measures relative price levels for consumer goods and services in participating areas. The nationwide average for all participating places, both metropolitan and nonmetropolitan, equals 100, and each participant's index is read as a *percentage of* the nationwide average. The Index does not measure inflation (price change over time): each quarterly report is a separate comparison of prices at a single point in time, and both the number and the mix of participants may change from one quarter to the next.

The Index reflects cost differentials for a *midmanagement* standard of living. Operationally, this standard of living is set by the weighting structure. Homeownership costs, for example, are more heavily weighted than they would be if the Index were structured to reflect a clerical worker standard of living or average costs for all urban consumers. (Weights for component indexes appear above column headings -- 17% for Grocery Items, for example.)

Because the number of items priced is limited, it is not valid to treat percentage differences between areas as exact measures. Since judgment sampling is used in this survey, no confidence interval can be determined. Small differences, however, should not be construed as significant -- or even as indicating correctly which area is the more expensive.

PARTICIPATING AREAS: Areas included in this survey are those where chambers of commerce or similar organizations have volunteered to participate. The number of respondents varies from quarter to quarter, and ACCRA makes a continuing effort to expand coverage of metropolitan areas. Any metropolitan areas not represented in this report is absent because the chamber of commerce serving its central city has opted not to collect data. *ACCRA has no data for areas which do not appear in this report.*

PRICE REPORTING: ACCRA stringently reviews all prices reported, and attempts to eliminate errors and noncompliance with specifications. All price data are obtained from sources deemed reliable, but no representation is made as to the complete accuracy thereof. They are published subject to errors, omissions, changes, and withdrawals without notice.

SPECIFICATIONS: The specific items priced are listed on page iii. The specifications for all grocery items are self-explanatory. Abbreviated specifications for all nongrocery items are presented only as a guide to users of this report; far more detailed specifications are contained in a manual provided to participants.

EXCLUSION OF TAXES: ACCRA is fully cognizant that state and local taxes are an integral part of the cost of living, and that tax burdens vary widely not only among states and metropolitan areas, but even within metropolitan areas. Due to the multiplicity of state and local taxes, taxing jurisdictions, and assessment procedures, it is not feasible to calculate local tax burdens reliably. ACCRA has opted to produce an Index which adequately measures differences in goods and services costs, rather than to produce an inaccurate measure which attempts to incorporate taxes levied on real and intangible property, retail sales, and income.

QUARTERLY SURVEY DATA PRESENTED IN THREE SECTIONS:

URBAN AREA INDEX DATA: This section arrays places alphabetically within state, and shows each place's Composite Index and six component indexes: Groceries, Housing, Utilities, Transportation, Health Care, and Miscellaneous Goods & Services.

METROPOLITAN AREA INDEX DATA: This section presents the same data as the first, but is restricted to places within Metropolitan Statistical Areas (MSAs) or Primary Metropolitan Statistical Areas (PMSAs). Places are listed alphabetically within MSA/PMSA. This section can be helpful when the central city of a metropolitan area is not represented in the Index, but suburban areas are. While Index data for suburban places can be used as surrogates for central city data, users should note that cost of living differences can exist within large metropolitan areas, and that data for suburbs may not match those which might have been obtained for the central city or for the entire MSA.

AVERAGE PRICES: The average price reported for each item in the survey is shown for each participating place. Places are listed alphabetically by state. After the final state listing, this section presents the nationwide median, average, standard deviation, and range for each item.

SUBSCRIPTIONS: This quarterly report is available by subscription for $100 per year. Subscriptions begin with the current issue unless the subscriber specifies otherwise. Single issues of current or back reports may be purchased for $50 each. Subscription order forms are available from participating chambers or from the address above. Subscriptions or single issue orders may be placed directly with ACCRA's treasurer: Mrs. Alice M. Klein, Louisville Chamber of Commerce, One Riverfront Plaza, Louisville, KY 40202. Check (payable to "ACCRA") or government purchase order must accompany each subscription; telephone orders cannot be accepted.

FOR MORE INFORMATION: If you have questions on data, contact the Research Department of your local chamber of commerce. If you have questions on procedures or methodology, contact either C. A. Kasdorf III, The Greater Houston Chamber of Commerce, 1100 Milam Building, 25th Floor, Houston, TX 77002 (713/658-2466) or Ed Sturgeon, Lexington Chamber of Commerce, 330 East Main Street, Lexington, KY 40507 (606/254-4447).

ACCRA: The American Chamber of Commerce Researchers Association, founded in 1961, is a nonprofit professional organization comprising research staff of chambers of commerce and related organizations throughout the United States and Canada. In its dedication to improving business information through research, ACCRA developed the Cost of Living Index to meet the need for a measure of living cost differentials among urban areas. Originally titled the *Inter-City Cost of Living Indicators Project*, the ACCRA Cost of Living Index has been published quarterly since 1968.

ACCRA has no permanent office. Staff functions are carried on by volunteer members. ACCRA is an affiliate of American Chamber of Commerce Executives, 4232 King Street, Alexandria, VA 22302.

Price Report Column Headings

The items and specifications in this pricing study are listed below. The descriptions for HOUSING and UTILITIES are briefly highlighted, since pricing is based on explicit procedural instructions and very detailed specifications. Monthly housing payments and utility-use charges are not community-wide averages and should not be construed as such. ● Pricing is based on sampling averages. The concept of a mid-management executive household is the guideline for selecting establishments and neighborhoods in which to price, and the minimum number of establishments to be surveyed depends upon the size of each community. ● To ensure uniformity, national brands are stipulated whenever possible, and "lowest price" is the reported average of the lowest prices found in all stores surveyed. ● Housing prices are published in whole dollars. All other items are presented in dollars and cents and published without the decimal point.
